

PHLB1010: Phlebotomy Procedures

Clock Hours: 48 (Theory 24, Lab 24) (Ground 24, Online 24)

This Continuing Education course provides practical instruction in the field of phlebotomy and prepares students to sit for various national certifications. Topics discussed include patient preparation, routine and non-routine specimen collection, safety procedures and infection control, documentation, as well as legal, ethical and professional considerations and other roles of a phlebotomist in healthcare. Students will also practice phlebotomy skills for venipuncture and capillary punctures in a laboratory setting.
